

Beating Breast Cancer - Saving Lives

Funded through NSW Health and community support, the NSW Breast Cancer Institute has three Programs:

CLINICAL... in which we 'Save Lives' today through our breast cancer multidisciplinary treatment model which puts women and their families first in the pathway of care.

RESEARCH... working towards 'Beating Breast Cancer' in the future through innovative research projects.

EDUCATION... a 'two-tiered' approach, providing information to women allowing them to maximise their quality of life and providing education to health professionals enabling them to deliver the most up-to-date treatment and care.

The support you show today will make a difference in the lives of women tomorrow.

We invite you to share our vision and join us in our journey towards...

Beating Breast Cancer - Saving Lives.

Wording for a bequest
